DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Independent claim 7 recites "inputting an ephemeral interest into a client by scanning a travel itinerary to generate a digital representation of the travel itinerary, the travel itinerary including the ephemeral interest, wherein the ephemeral interest is of use in identifying at least one content item to be included in the publication."

Although the closest prior art system of DeLorme generates a printed publication that may include various ephemeral interests, DeLorme does not disclose that the ephemeral interests from the scanned document are used to determine the content published on the printed publication (in combination with the other claimed limitations and/or features), as claimed in independent claim 7. Rather, DeLorme teaches that most of the ephemeral interests are inputted manually by the user through the WHERE?, WHO/WHAT?, WHEN?, and HOW? menus. DeLorme is silent as to what may be scanned by the scanning device and how that information is processed. DeLorme is silent as to whether the scanned information is digitized or parsed and whether the digitized information can be used to determine the content in the printed publication.

Dependent claims 37 and 39-41 are found to be allowable as they are dependent on allowed independent claim 7.

Independent claim 8 recites "inputting an ephemeral interest into a client by scanning a ticket to an event to generate a digital representation of the ticket, the ticket

including the ephemeral interest, wherein the ephemeral interest is of use in identifying at least one content item to be included in the publication."

Although the closest prior art system of DeLorme generates a printed publication that may include various ephemeral interests, DeLorme does not disclose that the ephemeral interests from the scanned document are used to determine the content published on the printed publication (in combination with the other claimed limitations and/or features), as claimed in independent claim 8.

DeLorme is silent as to whether the scanned information is digitized or parsed and whether the digitized information can be used to determine the content in the printed publication.

Dependent claims 3, 4, 38 and 42-44 are found to be allowable as they are dependent on allowed independent claim 8.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
